1) General Services Administration (GSA)

And

Served on GSA at efax: 540-301-0160 and by email: registrar@dotgov.gov and by International Notary presentment

Charging Instrument

The Government of The United States of America, (hereinafter "Government") organized under the Articles of Confederation in force 1781, as amended August 5th, 2015, shall state the following as accurately as possible without recourse under foreign sovereign immunity, and

Grounds for the International Tort Claim

The grounds for this international complaint include but are not limited to the violation of the intangible property right to honest services of which, if any Articles within the Universal Declaration of Human Rights (UDHR)¹ are violated, dishonest services are revealed to the International Community through those violations, to wit;

GSA is without authority and right to govern .gov.

GSA claims the following on its website:

¹ United Nations: <http://www.un.org/en/universal-declaration-human-rights/index.html>

"You have reached the General Services Administration (GSA) website for domain name registration for the U.S. government. Since 1997, we have been proud to manage the .gov and .fed. US top-level domains."

It mentions the U.S. Government wherein no such entity exists as a Government. It is neither defacto nor dejure as a government since its creation in 1787.

The private company started in 1787 under the president of the company that being George Washington. Today's successor verifies this information on Dunn and Bradstreet

Enacted under Article II Section I of the Constitution. Formed in 1787.
 Business started 1787.

RECENT EVENTS:

On June 2, 2011, sources stated that, The Obama administration announced that it plans to close 137 of the 2,094 federal data centers by the end of the year 2011. The closures would affect 16 federal agencies, including the Pentagon and the State Department. The plan aims to close a total of 800 centers by 2015, which officials project would save \$2 billion annually. Of the total closures, 57 will be within the Defense Department, 18 in the Department of the Interior and 14 in the National Aeronautics and Space Administration.

BARACK H OBAMA. Antecedents not available.

JOSEPH BIDEN. Antecedents not available.

Labor surplus area:	N/A
Small Business:	N/A
8(A) firm:	N/A

The details provided in the Government Activity section are as reported to Dun & Bradstreet by the federal government and other sources.

The company has been doing business as government which is neither a defacto nor dejure National Government, and is not Government itself. Its long line of presidents have all been linked to or related to George Washington as his heirs to operating his private oligarchy and not a National Government. Therefore, it is not with any right or privilege to advertise itself as a National Government or speak on behalf of the country as a National Government.

The city of Washington D.C. was formed into a city-state wherein the 50 state representatives convene to discuss the business of each state and oligarchy business, not National Government business. It is reported that the states formed a union under the constitution of the United States of America, an entity that names Prince George, III as “arch-treasurer and prince elector”.

It having pleased the Divine Providence to dispose the hearts of the most serene and most potent Prince George the Third, by the grace of God, king of Great Britain, France, and Ireland, defender of the faith, duke of Brunswick and Lunenburg, arch-treasurer and prince elector of the Holy Roman Empire etc., and of the United States of America. (The Treaty of Paris, 1783)

That particular constitution of the United States of America was not in existence in the year 1783. Therefore, the states could not have ratified that treaty. One can only conclude that the treaty was formed as a treaty with England that treated with a company it owned— the British East India Trading Company— a franchise of the East India Trading Company owned by the Dutch.

The country known as The United States of America

The beginnings of the right of self-determination started in 1775 as a league of independent states. Since 1781, the country has experienced turmoil:

From the Declaration of Independence of 1776 it began:

- 1: the thirteen united States of America, then in the same document, it reads:
- 2: the united States of America, then
- 3: The United States of America, then in the middle of that, someone else created:
- 4: the United States of America, then after the civil war,
- 5: United States, then
- 6: UNITED STATES OF AMERICA, INC.

That is six different entities in a 200 year period created by the oligarchy. However, The United States of America was welcomed into the family of nations under the particular country stile: “The United States of America”. Name changes have been used nefariously to create confusion and agitate the people and to give the people the illusion of representation.

Correcting the Past

The first thing the American Nationals had to do was sign the Declaration of Independence. Next was to sign the Articles of Confederation of 1781, claim it, issue notice and wait 90 days for any objections. As there were no objections, authority to revamp the original Government passed to the American Nationals.

Why the confederacy of 1781? It is because it was the only government that was voted in by all 13 independent states. Further, the original General Post Office was at stake. When Governments fall, all offices and every attribute of that Government reverts back to the General Post Office from whence it came.

Once American Nationals were parties to those agreements, the Declaration of Independence gave them the authority to change government:

"That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness."

American Nationals found some discrepancies. Whenever someone changes an entity, in order for the former entity to retain the rights of the present entity, it shall read "as amended". Thus, when the first entity, the thirteen united States of America was created, and in the same document it read the united States of America, it should have read: "the united States of America, as amended, then in the Articles of Confederation of 1781, altogether, it should of read: The Stile of this Confederacy shall be: the thirteen united States of America, as amended to "the united States of America" as amended to: "The United States of America".

Now the Confederacy has a Declaration of Independence, and the Declaration of Independence is legally connected to a Government. This discrepancy was corrected by the current American Nationals in the Articles of Confederation as amended during a constitutional convention held by the Confederation Party as amended to the North American National Party.

The discrepancies should have been corrected in the constitutional convention of 1787, however, that was not on the agenda of George Washington and his allies of Europe.

The second issue was found in 1783 in the Treaty of Paris: "It having pleased the Divine Providence to dispose the hearts of the most serene and most potent Prince George the Third, by the grace of God, king of Great Britain, France, and Ireland, defender of the faith, duke of Brunswick and Lunebourg, arch-treasurer and prince elector of the Holy Roman Empire etc., and of the United States of America."

Where did this new country come from that made an enemy of the Confederacy its Arch Treasurer? The answer is: it didn't. King George was treating with his own company and placed himself as Arch Treasurer.

Then the same king started naturalizing people as citizens of the United States requiring white males only as part of the naturalization qualifications. King George had Alexander Hamilton establish, a year after the Treaty of Paris, the Bank of New York in 1784. The Bank of New York is now doing business as The Bank of New York Mellon in the foreign country of Manhattan Island under Dutch rule.

King George claimed the same territory that was at the disposal of the Confederacy of 1781 and started monetizing. The Masons started this alleged "new government" for King George. The same entity "the United States of America" still treats with the Vatican and the Crown. The Monarch of England continues to treaty with itself.

Here is how the "Grand Constitutional Convention" played out: The Masons came together, in the name of their king, the Vatican, and the city of London, under the premise of amending the Articles of Confederation. However, when the convention ended, George Washington signed the 1789 Constitution with 39 delegates as witnesses. This is significant as the Articles of Confederation, under Article XIII, required 74 delegates for amendment otherwise the document could not undergo amendment. Thus, a proper amendment to the Articles of Confederation never occurred. A new document, the constitution, usurped the authority of the Articles of Confederation having been advertised as a National Government even though it did not qualify as defacto or dejure government.

No one else has ever signed the 1789 constitution, so no one else is a party to it. The entity within that constitution is the United States of America. Interestingly, research seems to establish that each president from George Washington forward, has been a relation to George Washington, as well as a Mason. Private membership associations cannot claim government powers and authority outside of the association.

Today, the only way out of this web of illusion is to declare exile and proclaim the existence of a new nation or declare exile and declare the existence of the original abandoned Government, fix its legal problems and correct the historical record. American Nationals decided to honor the 650 thousand people that died to establish the country at that time. The American Nationals corrected the chain of title to the country and fulfilled the constitutional convention as it was intended by the revolutionaries to amend the Articles of Confederation into a National Government.

In order to bind your person within that nation is through an oath or affirmation to that nation which is called the set apart spirit in the Scriptures.

The nation must have a General Post Office. It also required many offices that the original Articles of Confederation did not establish. Thus, it was properly amended in August of 2015.

Then the only way into the original independent states was through The United States of America because it was an inter-governmental organization of independent states that had power of attorney for the States when dealing in foreign affairs. It was also the original Union of people within those independent states. According to the Articles of Confederation, the people were in Union and the states were in league known as a league of friendship.

The United States of America was still classified as a central Government and therefore has a right to speak on behalf of the country. The Government of The United States of America has the legal right to regulate Interstate Commerce as the National Government.

Since the .gov top level domain falls under National Government and not a federal union of states also known as a union of private companies, the Government of The United States of America has the right to govern the .gov top level domain and regulate it.

The federal union of states also known as U.S. states are issuing private companies the .gov domain name that are not with the right to issue obligations, bonds, security instruments and a host of judgments, orders and indictments outside of their organizations against the General Public. Those private companies do not exist within National Government authority and cannot advertise themselves as a government entity.

GSA is violating every Article of the Universal Declaration of Human Rights and every Article of the Convention of the Rights of the Child adopted by the Government of The United States of America. The private companies do not have any authority to speak for the United States that resides within the Government of The United States of America. All obligations from those private companies are null and void regardless if the states within the federal union agreed or not through separate compact agreement under the company Articles known as the constitution of the United States. Either way, a private company is not with the authority to operate as a government and the States should have known to correct this serious legal conflict.

A State does not derive its authority from other states, it derives its authority from the people wherein is the conflict of the law of nations that GSA implements on a daily basis. GSA has consistently failed to distinguish whether or not the entity that received the .gov domain was a government voted into existence by the people or a self interested private company.

The District of Columbia and the city of Washington D.C. city state resides within the metes and bounds of The United States of America and therefore, even though it is an independent city-state, it needs to respect the National laws of the Government of The United States of America that is subject to the Law of Nations.

City states as far back as the city states of Greece knew that they did not have National jurisdiction and therefore refused to create a National Government to bring Greece together as a full fledged country which eventually led to the city states downfall.

General Post Office

The General Post Office of 1775 did not have a successor past Ebenezer Hazard. The following is from the ledger of Benjamin Franklin.

by Congress for that purpose, -- Doctor Franklin on the 7th of November, 1776, was succeeded as Postmaster General, by his relative Richard Bache who remained in office to the 28th of Jan'y 1782 when he was succeeded by Ebenezer Hazard, who was the last head of the General Post Office under the Confederacy.

In 1790, there were but 45 Post Offices throughout the United States, and but 1575 miles of post routes. The General Post Office, in the year 1790, was located in New York, and Samuel Osgood of Massachusetts was the first P.M. Genl. under the Federal Government. This

The original chain of title has been restored in 2012 and therefore under basic human rights, religious and political rights. The three city-state empire, that being the city of London, Vatican City and the city of Washington D.C. are obligated to work with the National Government to restore the rights of the child to acquire a Nationality. Instead, the three city-state empire (empire) with the control of the .gov domain through GSA is enforcing the following:

Profiling as Sovereign Citizen

The empire is profiling a documented American National as a "Sovereign Citizen"², arresting, detaining, and isolating a documented American National from the National Government. The Empire is engaging in intimidation, threats and perpetrating arbitrary actions including but not limited to passive aggressiveness and gang stalking in violations of the UDHR and the Convention on the Rights of the Child (CRC)³ of which the empire is a party.

The Government of The United States of America suffers retaliation from the empire by attempting to murder documented American Nationals from its creation of political assassins.

Trafficking

All documented American Nationals are classified as non-citizens, non-resident aliens to the United States of America by the empire. The Government of The United States of America agrees with that classification.

Documented American Nationals are being trafficked by private companies to its courts and obligations are being imposed without any authority thanks to GSA and its policies and procedures.

Not one of the companies exist within any state constitution nor any constitution within the National Government nor are they registered to do business within any of the states. These private companies simply do not exist and they claim to do business as government, prosecution, law enforcement and many other titles. Each one of these companies that receive the GSA blessing to use a .gov domain name are committing many acts of terrorism while operating as mercenaries and therefore GSA is fully responsible for its negligence.

² "Sovereign citizens are anti-government extremists who believe that even though they physically reside in this country, they are separate or "sovereign" from the United States" (FBI Website: https://www.fbi.gov/news/stories/2010/april/sovereigncitizens_041310, retrieved July 13, 2016)

³ United Nations: <http://www.ohchr.org/EN/ProfessionalInterest/Pages/CRC.aspx>

Denial of Nationality / Forced Contract/ Slavery

The Government of The United States of America has introduced a National currency, the Continental Dollar, in various denominations. This National currency has been denied access to the international financial system because of the international financial systems black market activities. This is a denial of a Nationality and a violation of Article 15 of the UDHR because GSA has refused on two separate occasions to issue a .gov domain to the General Post Office.

GSA is not qualified nor is it properly managed to assure the people that the entity that is granted .gov is literally a government entity that was voted into existence by the people through popular vote.

The Internet Corporation for Assigned Names and Numbers (ICANN) is a governing body of top level domains, the Government of The United States of America is confident that ICANN did not intend for any top level domain to be issued in the form of .gov to a host of private companies.

The Government of The United States of America is dedicated to providing the right to acquire a nationality to the people of the country known as The United States of America.

Relief Sought by the Government of The United States of America

1. The Government of The United States of America is seeking regulatory authority over the top level domain .gov to regulate its use and maintain the integrity of the top level domain system.
2. The Government of The United States of America is offering an option to GSA to register its existence with the Government of The United States of America and accept its regulatory authority when granting the .gov domain. The nationalization of GSA will ensure its responsibility of becoming human right compliant while administering its services.
3. The Government of The United States of America, through the United States, in Congress assembled gives GSA 30 days to correct its human rights violations and its violations of the Rights of the Child; or come under the Dissolution Act of 2015 where the agency is dissolved thereby providing the Government of The United States of America the right to remove the illegal blockade and regulate the top level domain .gov; wherein the country starts its restoration process to reach the level of human rights compliance in its foreign relations and all other aspects of Government functions.

To: lee.ellis@gsa.gov.getnotify.com

Dear Lee Ellis,

I am writing in regards to obtaining a domain name. In order to refrain from lying due to the choices on the DOTGOV website, there is no choice for a National Government on DOTGOV. So we would like to have generalpostoffice.gov as a domain. Please let this office know how this can be accomplished. Thank you for your time and consideration in this matter.

Kind Regards,

Tom Goudey

Subject: Claiming a .gov domain

Dear Registrar,

I hold the office of the Secretary of State of the newly reformed Government of The United States of America, 1781-2014. The Government I represent is seeking a ".gov" domain. When I try to register with your site, the category we are seeking does not exist. However, it appears in your company profile that your company does have the resources to resolve this issue. Please feel free to contact this office at your earliest convenience if your company has any questions. The Department of Defense does know about our Governments activities, however, does not know about this request for a ".gov" domain, nor did our Government ask them to clear this request. Our current Government website is <http://www.theunitedstatesofamerica1781.com> and our Government directory is www.generalpost.info to find all of our websites.

Attached is the authorization for this request.

If there is a more suitable avenue or venue for us, please do not hesitate to let us know.
